

Trustee James Young was able to put in some more time working on our flooding issues. He purchased and placed longer drainage hoses on the back down spouts. He also noticed a blockage in the left sided down spout. Unfortunately, attempts to move the blockage did not work. We need someone to get up on a ladder and work on the blockage.

We have been collecting donated books for a library book shed. All we now need is to move towards a ramp into the building, and shelves to place the accumulating donations on. If, we go to BOCES for help, could we also request bookshelves for the growing young adult book collection in the basement? Thank you for your consideration.

Respectfully submitted,

Carla Piperno-Jones, director
